

CASE STUDY SPEEDY SERVICES

THE CLIENT

Speedy Services are the UK's largest hire provider, with the widest range of power tools, plant and specialist equipment. Their mission is to provide safe, reliable hire equipment and services to enable the successful delivery of customer projects. Their commitment to customers is always underpinned with health, safety, the environment and community, ensuring that they remain a responsible business.

THE CHALLENGE

Safpro was chosen to supply for staff working in over 200 branches of a major specialist tools and equipment hire company. As well as being a supplier for the staff in the company, we were also tasked with supplying workwear, safety footwear and PPE for the client to sell through their retail outlets in the UK and Ireland.

THE SAFPRO APPROACH

The client was looking for a workwear and PPE supplier that would help them achieve their goal of consolidating supply and reducing costs, whilst at the same time improving product quality and account management.

Safpro offered a solution that achieved those objectives. The result is the client's employees enjoy the best level of protection in terms of health and safety, as well as promoting a strong, consistent brand.

THE RESULT

The robust corporate workwear and PPE supplied by Safpro offered protective clothing for employees, who work in a variety of environments where safety is key, such as construction sites, workshops and railways.

This case study shows how Safpro can deliver large orders of work clothing and PPE confidently, with well developed and proven systems in place from the start of the relationship with the client.
