

PTIMISE

STREAMLINE ● TRACK ● CONTROL

PART OF
SAFPR 

WELCOME

Common industry challenges

- Non-compliant product and suppliers
- Spend leakage
- Poor visibility of user history
- Purchasing admin time
- Manual requisition processes
- Limited control of day-to-day expenditure

Our overarching objectives

- Driving compliance
- Restrict to core product range appropriate to roles
- Automated approval processes
- Alert systems for compliance
- Streamline ordering process from user
- Live 24/7 reporting and MI
- Control by budgeting with points allowance
- Multiple authorisation levels

OPTIMISE STOCK

A quick and straightforward way to order your requirements. You can instantly access your key products which are categorised into product groups i.e. Footwear, Outerwear, Trousers, Gloves etc.

OPTIMISE PACK

Offers all the advantages of the Trade module and lots more. All ordering is wearer specific, allowing you full control and management of all requirements for all employees.

ADMINISTRATION

Chosen users have the ability to amend administrative details. Immediate changes can be made to Optimise from adding new employees to amending delivery addresses.

MANAGER

Full visibility & access to all aspects of the portal. See details for all employees across all areas of the company.

AREA MANAGER

Ability to access & view employees within an area (i.e. North & South) or for managing multiple teams.

SUPERVISOR

Management of a single team or location, with visibility of only these employees.

USER

Login & view their own personal details & order history. Visibility of their rolespecific range only.

“

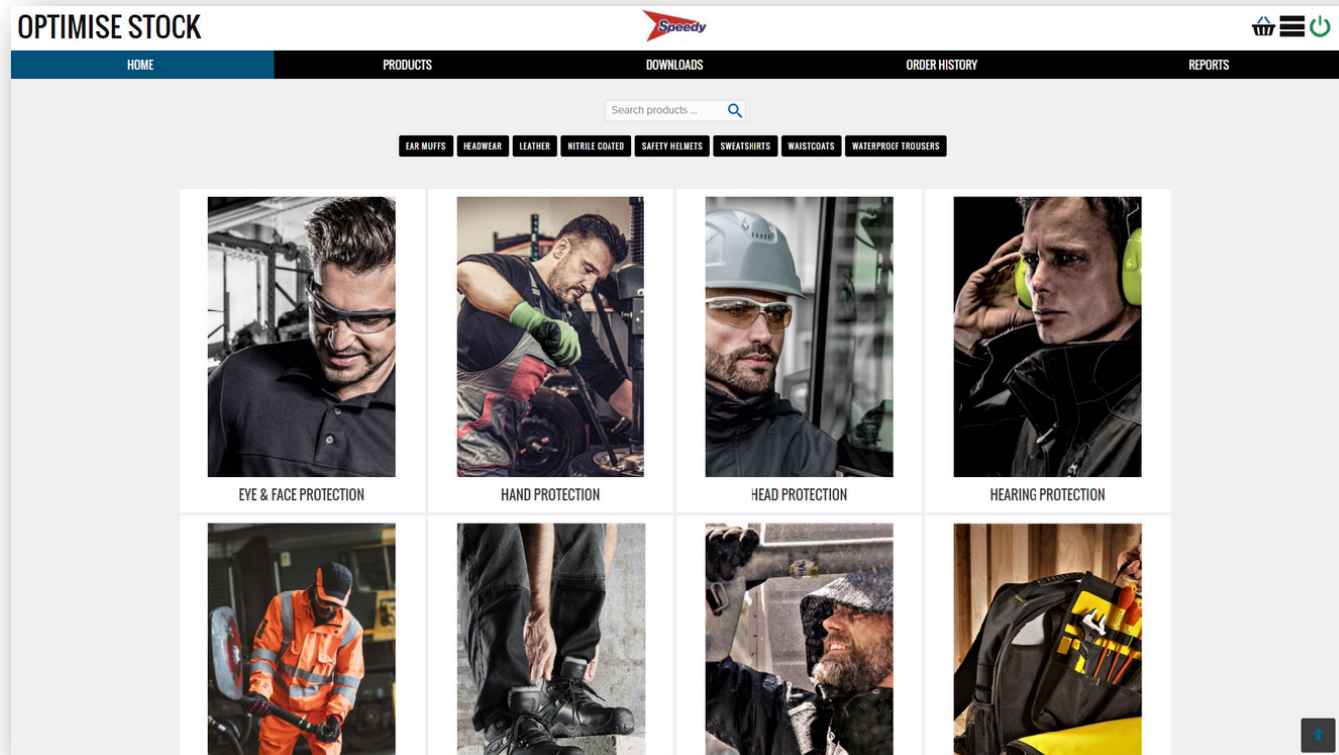

SAFPRO MAKE THINGS A LOT EASIER;
WE'VE GOT A LOT OF ENGINEERS SO
WE NEED A LOT OF PPE AND
UNIFORMS. THE PORTAL IS EASY TO
USE AND NAVIGATE; IT'S MADE THINGS
EASIER FOR THE END USERS AND THE
MANAGEMENT SIDE

”

Chubb

ORDERING

- Fast ordering of stock products across the size range
- Only allow access to an approved product range
- Preloaded with your special prices
- Ability to order 24 hours a day, seven days a week
- Online catalogue to easily browse the range available
- Authorisation process for different spend levels
- Full online reporting facility in various breakdowns and formats
- Check order status and consignment details for delivered orders

The Optimise Pack system is preloaded with an employees' data, including name, job role, branch and other relevant information. By selecting the employees name you will be able to view the range of products available for that employee. When processed, orders will be delivered and received with their name clearly marked for ease of distribution or receipt. For full visibility and reporting purposes, the employees previous orders will be stored on Optimise.

- Order for individual employees, one order can be placed for multiple employees
- Receive all packages clearly labelled for the wearer
- Points system to control allocation to each employee
- Full reporting by wearer and by branch
- Ability to be given access to personally manage employee details

your orders

REPORTS

Where you view
MI data

Images or List view for visual support or speedy ordering

Order by individual to receive items packed per wearer

Role specific wardrobe to the associated job role

Breakdown of employees by depot, department & cost centre

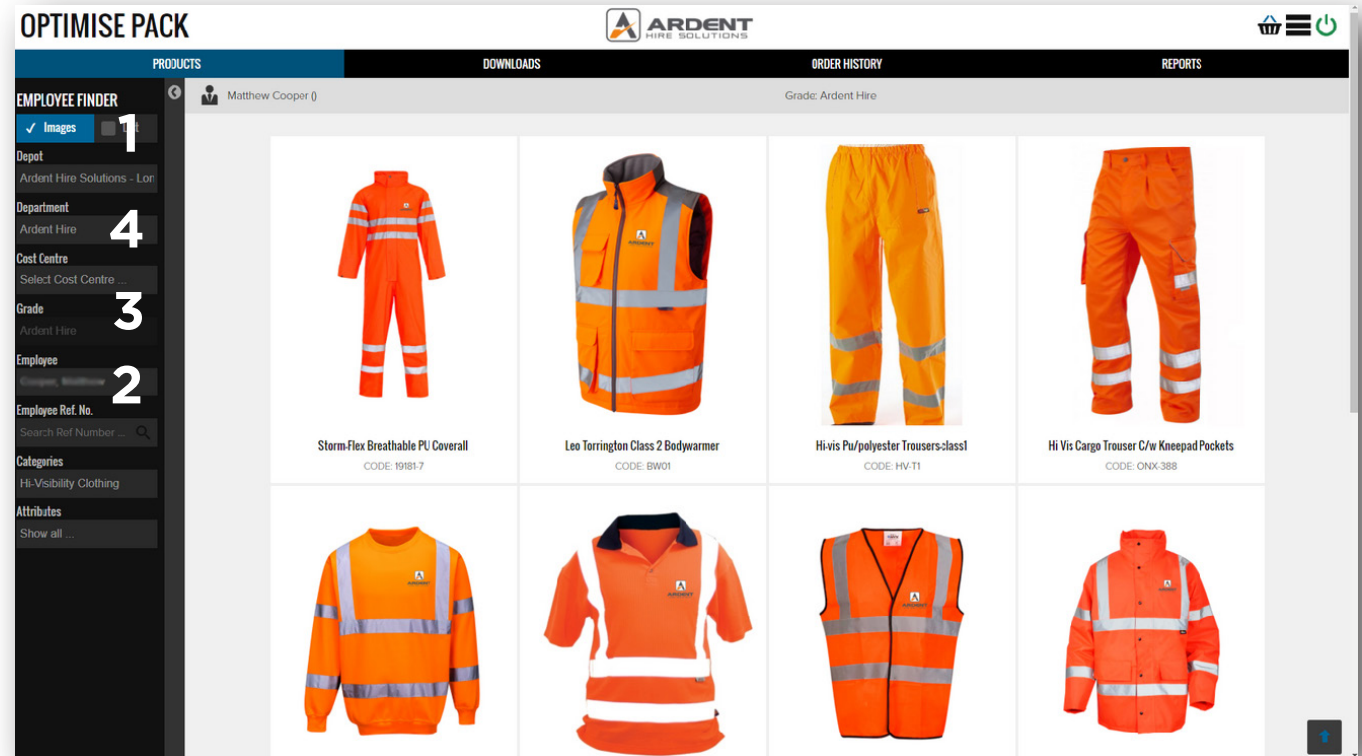

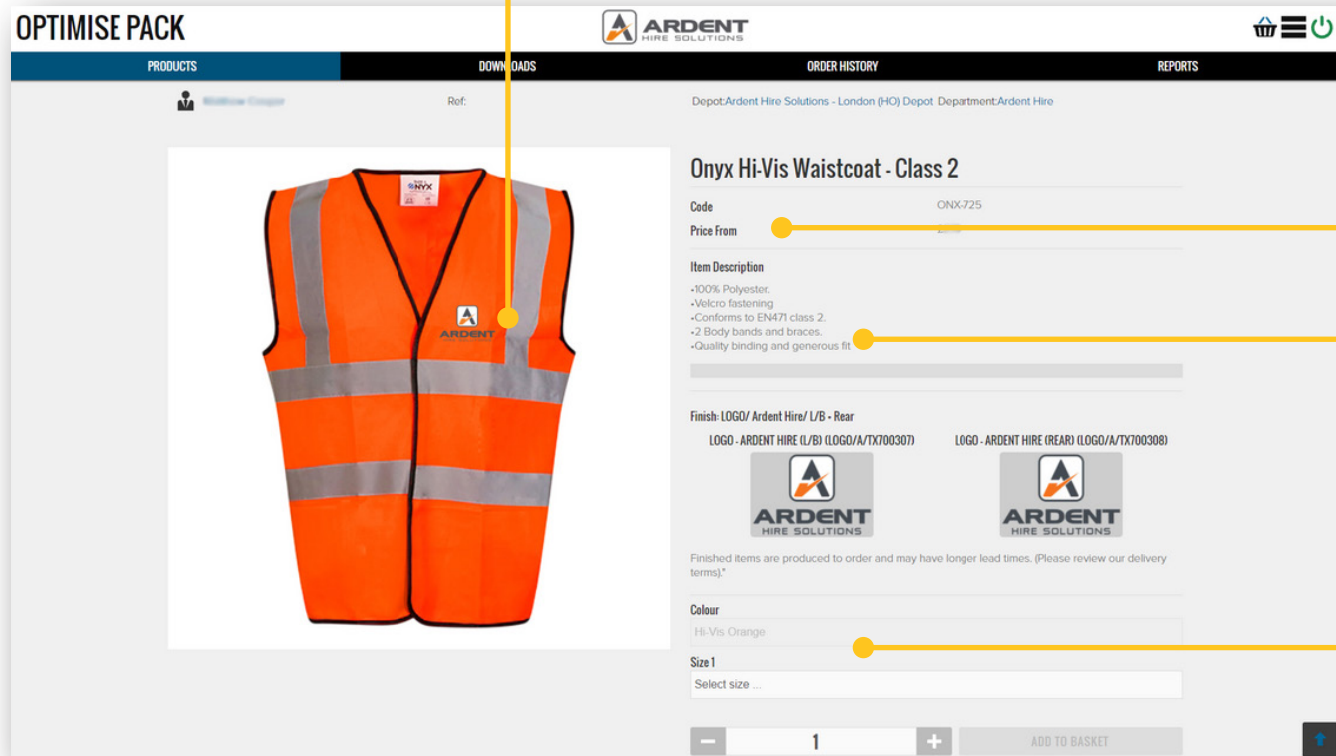

Image of branding to provide accuracy when placing orders

ability for contract price to be hidden or visible

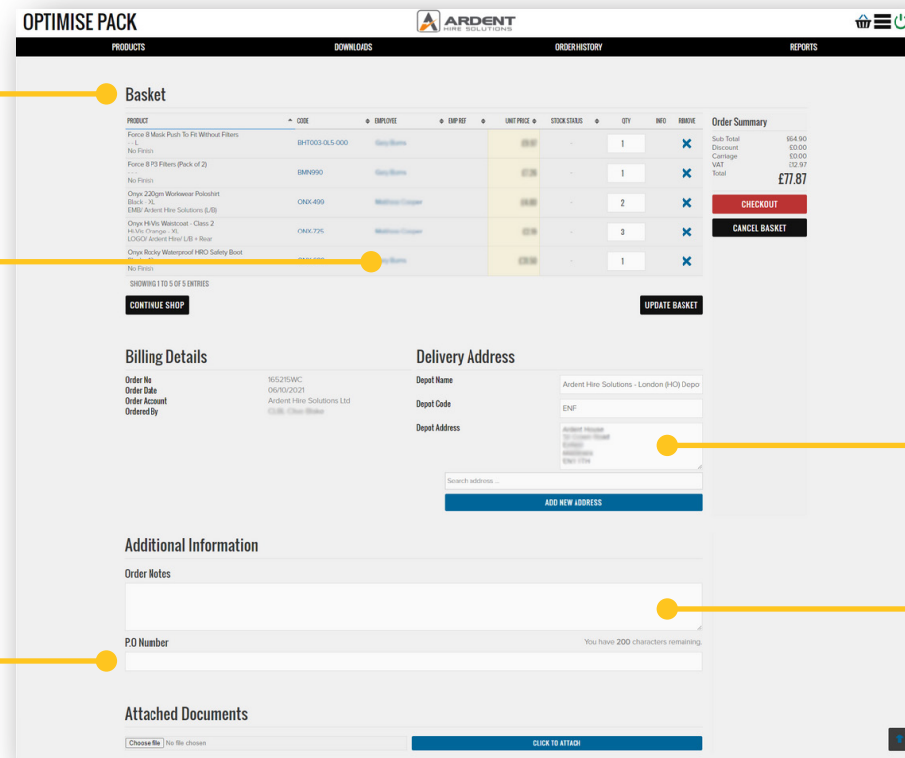

detailed product description for clarity when selecting products

required size, quantity etc. simply selected before adding to basket

overview of the basket and details of items purchased

click on employee to see a complete quick purchase history visual

insert PO number for the order, which can be **made mandatory** across all orders

delivery addresses can be **defaulted** or ability to **add new** address

any **further information required** for order including notes or an attachment

“

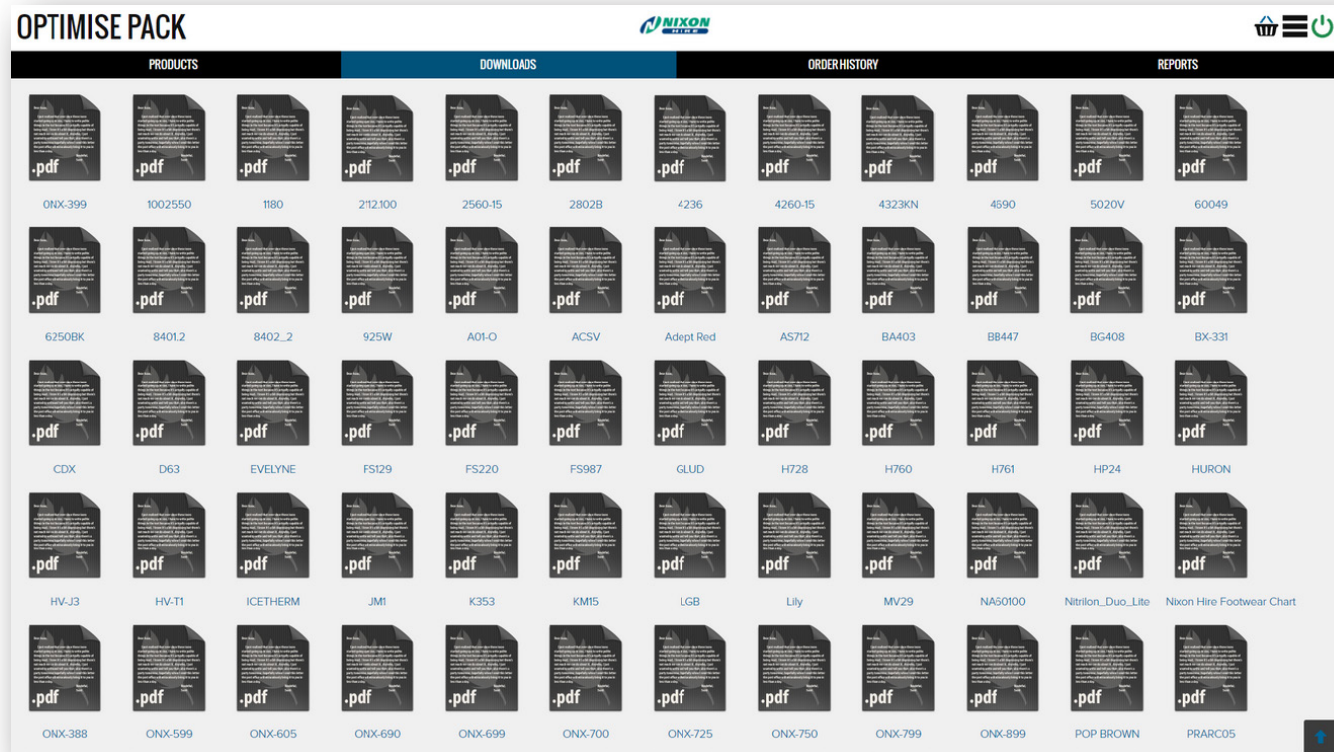

SINCE WE HAVE SWITCHED TO USING SAFPRO AND THEIR PORTAL, SPEEDY HAS ACHIEVED CONTROL OVER EMPLOYEE SPEND WHICH HAS MET WITH BUDGETS AND ENSURED WE HIT OUR SAVINGS TARGETS FORECAST FOR THE LAST FINANCIAL YEAR.

”

DOWNLOADS

Access your support material through the downloads portal. This information is available to all portal users.

Here are some examples of support material you might include:

- Sizing guides
- Specification sheets
- Declarations of conformity
- Optimise user overview
- Optimise portal video guides
- Safpro support team information sheet
- Technical & standards advice

ORDER HISTORY

ORDER HISTORY

To complete a transparent ordering cycle, Optimise users will be able to see the live status of their orders. Order History updates can simply be exported in various formats or emailed to an email address of choice.

Within this module you can filter the search by the below details:

- Date range
- Depot
- Employee
- Department
- Ordered by
- Customer PO

REPORTING

The screenshot displays the 'OPTIMISE PACK' reporting interface. On the left, a 'FILTERS' sidebar includes options for Start Date (07/2021), End Date (26/10/2021), Location, Department, Cost Centre, Grade, Employee, and Style (with a 'Style' button and 'SKU' checkbox). The main area shows a navigation bar with 'Employee' selected, and a table titled 'Employee Report'. The table has columns for EMPLOYEE, DEPARTMENT, GRADE, LOCATION, CODE, PRODUCT, QTY, TOTAL SPEND, TOTAL FINISH SPEND, TOTAL POINTS, EXTRA PPS, TOTAL PPS, PPS USED, and AVAILABLE. The table shows 5 entries for 'David Walker' with various products and quantities. A footer contains 'OPTIMISE COMPANY', 'OPENING TIMES', 'YOUR INFO', and 'QUICK LINKS'.

filter any date period from start of trading

high level reporting on depot or department

medium level reporting into job role or cost centre

advanced intricate filters for usage and employee and style

full suite of reports from start to end

view of points control allocation and usage, for category points system

share your report directly with a colleague

toggle filters for flexibility when reporting in Optimise e.g. highest to lowest qty

EMPLOYEE SKU REPORT

export and drill down into your reports

SKU filter provides additional information including colour, size, decoration of product

Ability to report on spend & usage from the employees that place orders

Visibility of quantities taken of each product line & usage per line

 STOCK

 INVOICE

Overview of all invoices processed through Optimise showing what has been delivered

ADMINISTRATION

- Chosen users can be given access to the Administration Module. You will be able to maintain your own portal, keeping locations, employees, and cost centres up-to-date.
- Adding new starters will enable you to order their new starter workwear and PPE kits as they are immediately live to order for.
- Deactivating employees will remove them from your ordering section, but their order history remains visible to you.

SOLUTIONS

AUTOMATED POINTS CONTROL

The two key outcomes are, firstly, an automated approval where points allocation for non-essential products can be orders up to and not beyond the agreed allocation in a set time period - for example, four points for four polo shirts in a rolling 12 month period. Secondly, you can have the assurance that operatives are not able to order outside their allowance and this in turn can relieve your team or the administrative tasks of checking and approving orders.

AUTHORISATION PROCESS

By introducing an authorisation process within Optimise, your teams at all levels can be assured requests for PPE will be captured and traceable, and prompts action by authorisers to avoid delays in this process. Different levels of authorisation can be set to fit your management structure. A two stage authorisation is available allowing line managers to approve and an administration department to insert a purchase order number.

REPLENISHMENT ALERT

Reminders are sent to the wearer's device, showing a replenishable range of core product available to the wearer, such as consumable PPE. The alert will fire on a custom time period. Wearers are required to self audit and ensure their personal compliance throughout their working week. This can all be cost managed by a points allocation to keep within budgets set.

INSPECTION ALERT

Optimise can generate automated email alerts notifying your team of assets which are due inspection. The asset owner, or other responsible personnel, will follow the alert process through to the inspection criteria within Optimise. The inspection is performed and the result is recorded, and will now be auditable in the reports module. If the asset fails, the user can immediately request a replacement item; if the asset passes, Optimise will schedule the next inspection date.

THANK YOU

We appreciate you taking the time to look through our overview of the Optimise ordering and management portal. Please reach out if you require any further details or would like a demo to explore how Optimise can benefit your organisation.
